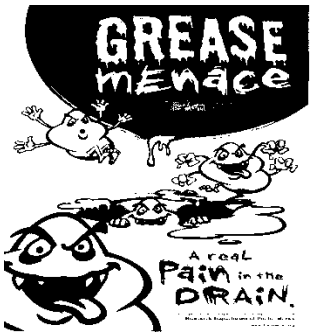
****REMEMBER TO CHECK THE WATER CONSERVATION HOTLINE FOR CURRENT WATER RESTRICTIONS! 214-509-3111. Call for recorded information on our current drought status before you water your landscape! Or check website: www.cityofallen.org/water-conservation **November 1-March 31 Stage 3 water restrictions only allow watering with sprinklers once every two weeks. Never water during rain/freeze events!**
****REMINDER: Overseeding the lawn with cool season grasses, any variety of fescues, bluegrasses, ryegrasses or others, is prohibited in our water conservation plan ordinance!**

Don't let the Grease Menace* get in the sewer!



Avoid placing fats, oils and grease down the drain or toilet. Even when flushed with hot water, it eventually cools and clings to the sides of your sewer pipes causing clogs and backups. Repairs can be costly to the homeowner! Use plastic or other containers with lids to properly dispose of cooled fats, oils and grease in your trash cart.

RE-DUCE, RE-USE, RE-CYCLE your LEAVES

Get outside and enjoy the fall weather! Rake and collect your leaves in paper lawn bags, then place the bags at least two feet away from polycarts on your trash day. A limit of 15 paper yard bags per week will be collected. This service is offered year-round. Another option is to start a home compost pile in your backyard using leaves as the carbon source (browns) and kitchen vegetable/fruit waste as the nitrogen source (greens). Information about home composting can be found at: www.composting101.com

All yard trimmings collected curbside or dropped off at the Custer Road Facility are used to produce compost, top-dressing, soil blend, and mulch. Visit www.texaspureproducts.com to learn more.
